Core Values

- Good health is our foundation.
- We must be good citizens.
- We work as a team.
- Invest in every customer.
- No fine print.

Draft of Privacy Statement

Introduction

Many organizations provide information and services through the internet. Much of the information and many of the services do not include personal or confidential information and are available to anyone accessing the internet. When access to information or services is restricted to protect your privacy or the privacy of others, you may be asked to provide a logon username and password. Your logon username and password verify your identity so that we can provide you with access to your information and services while restricting access by unauthorized individuals.

If you choose to accept the conditions of this user acceptance agreement, you will be prompted to provide the basic information that is required to issue a logon username and password. The information you provide will be stored in your user profile and will be managed according to our policy, as described below.

To create your logon username, we will ask you for your name, address, email address, telephone number, and your desired password. If the necessary information is not already stored, you will be given the opportunity to add that information to your user profile. If you have provided the information previously, there will be no need to reenter it. You will always have the choice to opt out and not provide the requested information.

However, if you do so, you may not be able to complete your transaction over the internet or use the app. You will also have the ability to review or update the information stored in your user profile.

Once you have registered on the website, your identification information, your contact information, and the other data you choose to provide will be made available to the appropriate business departments. Because we store this information, you do not have to provide it each time you use a service that has privacy or confidentiality restrictions. Please note that only certain types of information will be stored in your user profile, as described in the "Information Collected and How It Is Used" section below. Your user profile will never contain records such as credit card information.

Protecting Your Account

Your logon username and password are your keys to doing secure business over the internet. They should be considered as important as your signature. Do not share your logon username or password with anyone. Violators may be subject to prosecution, fines, or other sanctions.

Information Collected and How It Is Used

The information collected for user access to the internet account and health application is limited to what is required to provide secure delivery of those applications.

Information about users of these applications may include the following:

- Identifying information, such as names and other identification numbers, that is used to verify an individual's identity when they request a logon username to access applications.
- Contact information, such as telephone numbers, postal addresses, and email addresses, that is used to contact the individual regarding their account.
- Information, such as logon usernames, passwords, and related attributes, that is used to maintain security.
- Program area identification numbers that are used to link a user and a specific application. This information will not be collected or stored unless it is required for access to specific applications.

Personal Information and Choice

Personal information is information about an individual that is readily identifiable to that specific individual. Personal information includes identifiers such as an individual's name, address, and telephone number. A domain name or internet protocol (IP) address is not considered personal information. We do not collect any personal information about you unless you voluntarily participate in an activity that asks for the information.

Access and Correction of Personal Information

Individuals will be allowed to view personal information relating to their user profile and to update the contact information in their user profile (address, telephone, or email address). Passwords will be secured.

Use of Cookies

A cookie is a small amount of data, which may include an anonymous unique identifier that is sent to your browser from a website's computers and may be used during your session (session cookie). Cookies may contain data about a user's movements during their visit to the website. If your browser software is set to allow cookies, a website can send its own cookie to you. A website that has set a cookie can access only cookies it has sent to you; it cannot access cookies sent to you by other websites. When you request a logon username and password, a session cookie will be sent to your browser and stored in your computer's memory. The cookie will be used to maintain session information unless you navigate to different services. Your privacy is best protected if you close your browser after you are done using applications that use session cookies.
