

CYB 260 Project Three Scenario

An initial agreement has been made, and Helios Health Insurance has provided a service level agreement (SLA) that defines the relationship between Fit-vantage and Helios. You have been tasked with recommending the implementation of the controls detailed in the SLA.

Now that the partnership is in place, the insurance company's SLA contains the terms and conditions that require evidence of how Fit-vantage will address three critical controls—specifically, how the organization will use awareness training to defend against social engineering attacks.

The SLA covers several of the CIS Controls. Provide the steps needed to ensure that the following critical controls have been implemented:

- Control 5: Account Management
- Control 6: Access Control Management
- Control 14: Security Awareness and Skills Training

To complete this project, review the following documents:

- Service Level Agreement
- CIS Controls, Version 8

Links to these documents are on the Project Three Guidelines and Rubric page in the course's Assignment Information area.
