

CYB 260 Project Two Scenario

This scenario places you back in the role of an executive-level security consultant for Fit-vantage Technologies.

After much debate, the internal stakeholder board has provisionally approved the partnership with Helios Health Insurance. Prior to formally approving the partnership, the board has requested that you prepare a legal and ethical recommendation brief to identify an approach to meet the privacy protection, data security, and ethical requirements that this partnership will generate.

To complete this project, review the following documents:

- Fit-vantage Company Profile, which contains the mission statement, core values, and a draft of the Fit-vantage privacy statement
- HIPAA Privacy Rule Summary
- HIPAA Security Rule Summary

Note: The company profile and the HIPAA Privacy Rule summary are the same documents distributed for Project One. The HIPAA Security Rule summary is new. Links to these documents are on the Project Two Guidelines and Rubric page in the course's Assignment Information area.
